

Release Notes

NX System Release 14

March, 2010

Component Versions

NX System Release 14 consists of the following component versions:

- NX Editor Version: 1.0.14.190
- NX Tester Firmware Version: 2.14.153

Dependencies

It is strongly recommended that the upgrade be applied to the NX Testers and the NX Editor simultaneously

IMPORTANT NOTE:

Before updating your NX Testers to Release 14, please make sure that all programs are backed up.

New Features and Enhancements

NX System Release 14 contains the following new features and enhancements:

- **Support for NX View image files:** The NX Editor supports Image Fixtures in the NX View Information section of the Fixture Blocks View.
- **System Upgrade from memory card:** The NX Tester's firmware can now be upgraded via the NX Memory Card.

Bug Fixes and Improvements

NX System Release 14 provides the following improvements and includes fixes for the following problems:

- The NX Editor's Audit results can be copied to the clipboard
- The Immediate Miswire Display option box is automatically checked in the Test Display workflow item.
- The maximum length of Option Code Expressions has been increased to 256 characters.
- Errors from the Dielectric Withstand portion of the hipot test are now properly labeled in the report.
- When downloading programs from the NX Editor to the NX Tester via the serial cable, an option is now available to cause the program to automatically be executed immediately after the download.
