

Release Notes

NX System Release 2

August 23, 2004

Component Versions

NX System Release 2 consists of the following component versions:

- NX Editor Version: 1.0.3.62
- NX Tester Firmware Version: 1.4.50

New Features and Enhancements

NX System Release 2 contains the following new features and enhancements:

- User Interface Workflow Cell

Originally, properties were associated with Flow Arrows in the workflow. The Flow Arrow properties allowed for the specification of sounds, text, time delays, user interactions, and control interactions that were to be executed as the workflow exited the workflow cell to which the flow arrow is associated.

In Release 2, the Flow Arrow properties have been removed. The properties that had previously been associated with the Flow Arrows are now available in the new User Interface (UI) workflow item. This provides for additional flexibility, allowing transitional behavior to be specified at any point in the workflow, instead of being tied to the exit of a workflow item. A detailed description of the User Interface workflow item is provided in the *NX Editor User's Guide* dated August, 2004.

Dependencies

- Test programs created with NX Editor Version 1.0.3.62 can only be executed on NX Testers equipped with Firmware Version 1.4.50.
- NX Testers equipped with Firmware Version 1.4.50 can execute test programs created with NX Editor Version 1.0.3.62 as well as programs created with earlier versions of the NX Editor.
