

EPROM Version 7.035 Specification

Current EPROM Version: 7.035
EPROM Release Date: 10/1/2003
Previous EPROM Version: 7.034

256XL EPROM Part Number: 5280901
1024XL EPROM Part Number: 5280902
1536XL EPROM Part Number: 5280903
2048XL EPROM Part Number: 5280904

Improvements for upgrading from 7.032

When upgrading from v7.032 to v7.034, the Analyzer would sometimes appear to lock-up. V7.035 fixes this problem.

Note:

After replacing the eeprom with v7.035, the Analyzer must be reset before use. The following procedure explains how to reset the Analyzer:

1. Make sure Analyzer is turned OFF.
2. Insert a Dynacard
3. Depress the red STOP button, and keep depressed through step 4
4. With the red STOP button depressed, turn the Analyzer ON
5. Release the red STOP button
6. From the SETUP MENUS, select DIAG -> RESET -> YES (CONFIRM)
7. Turn the Analyzer OFF.
8. Turn the Analyzer ON.
