

EPROM Version 7.034 Specification

Current EPROM Version:	7.034	256XL EPROM Part Number:	5280901
EPROM Release Date:	3/1/2003	1024XL EPROM Part Number:	5280902
Previous EPROM Version:	7.032	1536XL EPROM Part Number:	5280903
		2048XL EPROM Part Number:	5280904

Extended Display

At times, it may be necessary to view Analyzer messages from a distance. Even though each Analyzer is equipped with an effective and legible display, the standard character height may not be suitable for viewing from a distance. The Extended Display solves this problem. The Extended Display provides a means of making important Analyzer messages visible from a distance. The Extended Display provides 2 lines of character information. Each line displays 20 characters, each character is 0.7 inches high and is displayed using bright red LEDs. This results in a display that can be easily viewed at a significant distance from the Analyzer.

Improved Startup Diagnostics

Improvements have been made to the self-test diagnostics that the Analyzer executes when powered up. These improvements provide for more comprehensive startup testing, resulting in greater reliability.
